Academic writing task 2

Heather Cho

2018년 4월 7일 문제

Students at school and university learn far more lessons with their teachers than other resources, for example the internet and television. To what extent do you agree or disagree?

Agree 입장

- Students can learn more from teachers

- Students can improve their intellectual senses by receiving education from teachers

At schools and universities, students learn academic subjects from teachers and teachers help them to understand knowledge in depth.

Agree 입장

- Students can learn more from teachers

- Teachers inspire young students in various ways

Young people can be a lifelong learner, and create a culture of independence with their enthusiasm and passion under teachers' cares.

IELTS Writing

Disagree 입장

- other sources such as the internet and television can be used for education purposes to students

- There are sufficient learning materials online and educational television programmes

The easy access to learning resources through the internet and television programmes has allowed students to learn any subject they are interested in.

Disagree 입장

- other sources such as the internet and television can be used for education purposes to students

- It can be an effective way of learning

Students will have more chances to read articles or materials in addition to their text books to understand knowledge, and it can lead them to achieve independent learning.

Essay 구성

1. **Introduction** (General + Thesis statement)
2. **Main body 1** (Disagree view)
3. **Main body 2** (Agree view)
4. **Conclusion**

2018년 4월 7일 문제 Sample answer

Introduction

It is believed that students can learn much more lessons from their teachers at schools and universities compared to other available sources such as the internet and television programmes. I strongly agree with this view as I believe that there are many aspects which only teachers can offer to their students.

2018년 4월 7일 문제 Sample answer

Main body 1

To begin with, other sources such as the internet and television can be used as learning materials for students. Firstly, there are sufficient learning materials online and educational television programmes – the easy access to learning resources through the internet and television programmes has allowed students to study any subject they are interested in.

Main body 1

In addition, it can be an effective way of learning these days. Students will have more chances to read up-to-date articles or materials in addition to their text books to understand knowledge, and it can lead them to achieve independent learning. (94 words)

2018년 4월 7일 문제 Sample answer

Main body 2

However, I firmly believe that students can learn more from their teachers. First and foremost, students can improve their intellectual senses by receiving education from teachers. At schools and universities, students learn academic subjects from teachers and it can be helpful for them to understand knowledge in depth.

Main body 2

Moreover, teachers inspire young students in various ways. Young people can be lifelong learners, and create a culture of independence with their enthusiasm and passion under teachers' care. They also help their students to create good values and views, morality, and so on. It eventually helps young people to create positive personalities. (101 words)

Conclusion

In conclusion, although secondary school and university students can learn much by using various sources, I opine that teachers can teach them a lot more than those methods. Thus, it is important to teach a lesson to young students with teachers' proper guidance. (43 words)
